PROFESSIONAL SUMMARY

Highly motivated BCA student with an academic focus and building-level proficiency in MERN Stack and Frontend Development. Competent in engineering dynamic web solutions with clean user experiences, integrating modern web APIs, and configuring local secure e-wallet gateways (eSewa). Eager to apply software engineering foundations in a dynamic software engineering team as a developmental contributor.

KEY PROJECTS

NepSky — Air Ticketing Platform

Academic Project

React.js, Node.js, Express.js, MongoDB, Tailwind CSS

- Developed a fully responsive flight booking application featuring a comprehensive administrative CRUD dashboard.
- Configured intuitive search filters to process flights, schedule bookings, and catalog user transaction paths.
- Designed the front-end layout utilizing Tailwind CSS, optimizing visual coherence across diverse screen formats.

E-Commerce Cloth Ordering System

Academic Project

PHP, MySQL, JavaScript, HTML5, CSS3

- Engineered a relational database-driven online storefront with full session handling, shopping carts, and dynamic catalogs.
- Created custom administration panels allowing secure real-time inventory updates and customer inquiry handling.
- Structured relational database schema normalized to ensure transactional integrity across multi-table order schemas.

eSewa Payment Integration Module

Independent Module

PHP, JavaScript, eSewa SDK

- Programmed a secure payment verification system utilizing eSewa's sandbox API environments to settle transaction balances.
- Structured payload verification logic validating response hashes to eliminate duplicate and unauthorized transactions.
